END DRAIN

WHIRLPOOLS AND SOAKERS

Clarion's extensive collection of beautiful, acrylic whirlpools and gel-coat fiberglass models provide many choices and designs.

Clarion uses Aristech Altair cast acrylic sheet

in all of its acrylic modules. All whirlpools come standard with rigid PVC piping, air control, suction inlet, and color coordinated trim. Standard depth of bathing well on acrylic units is 21 1/2". Extra space may be needed in the rough-in dimensions to accommodate the motor and pipes.

All Clarion Bathware tubs, soakers and tub/shower units can be fitted with whirlpool systems.

ARISTECH ALTAIR

Clarion Bathware uses Aristech Altair cast acrylic sheet in all of its acrylic modules. Aristech Altair is beautiful, durable and will not mildew or stain. Its hard, non-porous surface is scratch resistant. Its rich colors go all the way through the thickness of the material to ensure colorfastness and its high gloss finish wipes to a shine without scrubbing. Aristech Altair, easy to maintain with common household non-abrasive cleaning products, is your assurance of quality.

COLORS

Clarion stocks white, bone, biscuit and sterling silver acrylic sheet and a wide variety of gel coat colors to match your favorite china.

STANDARD FEATURES

Plumbing – We use only rigid PVC plumbing to eliminate sagging pipes that lead to residual water build-up that may harbor harmful bacteria.

Careflo Safety Suction System – This system is virtually flat to the tub wall resulting in added space inside the bathing well. When this unique device senses an obstruction, the pump goes into "standby" mode. Once the obstruction is removed, the pump resumes its normal operation in a few seconds.

On/Off Button – Simply push the button in to turn on your luxurious whirlpool.

Air Flow Control – Lets you select the bubbling action of your whirlpool by a simple turn.

Pump – Our state of the art pump comes standard with a run-dry seal. This seal will protect the pump for up to 1,000 hours should the unit get turned on when there is no water in the tub. A 1 H.P., single speed pump comes standard with the 4 or 6 jet systems. A 1-1/2 H.P., single speed pump comes standard with the 8 jet systems.

OPTIONS

Standard Whirlpool – These 3-5/8" jets are multi-directional, less obtrusive and more convenient. Each jet allows fingertip control of direction in a 360 degree range. Available in 4, 6, or 8 Jet Systems.

Combo Jet System – These 3-5/8" jets offer a pulsating whirly cartridge that offers two modes of massage: direct flow and pulsation. Combo System comes standard with the pulsating cartridge; to change to the direct flow, simply un-snap the pulsating cartridge. Available in 4 or 6 jet systems. These can also be intermixed as a pair with the Standard Jet System.

Bubble Jet Air System – This system propels pre-warmed air through jets that are strategically positioned on the sides of your tub. A slight touch of the electronic control offers you a stimulating or gentle massage. Now each member of your family can benefit safely from the massage as millions of air bubbles surround and caress your body. Each jet is designed with a center opening which releases powerful air pressure offering a complete massage to every part of the body.

Perfect Hygiene – Each jet has a built-in valve to prevent back flow in the air passage. Jets remain clean because no contaminated water can enter them and stagnate there. For additional protection, twenty minutes after use, the system initiates a one-minute drying cycle that dries out the jet valves, thereby ensuring a longer life and perfect hygiene. Available in 12 or 16 Jet Systems. Can be installed in addition to a Standard or Combo Whirlpool System.

Heater – This is for the Standard Whirlpools or Combo Jet systems, not available with the bubble jet systems. It is specifically designed to enhance the enjoyment of your whirlpool bath. This heater will only maintain the water temperature, NOT heat it up.

Mood Lites – Underwater mood lites offer a romantic setting, with interchangeable red and blue lenses. To activate the light simply push the on/off button.

FREIGHT INFORMATION

Clarion ships product on our own fleet of air-ride trailers with new tractors and company drivers. Assisted care products ship on Clarion's trucks or on any number of LTL companies contracted with Clarion Bathware.

LIMITED WARRANTY

Clarion Bathware offers a Three-Year Limited Warranty against defects in material and workmanship on fiberglass and acrylic products. Whirlpool systems carry a Full Five-Year Limited Warranty.

Customer Satisfaction, Quality and Service for Thirty Years!

WHIRLPOOLS AND SOAKERS

Clarion's whirlpool and soaker tub collection offers both acrylic and fiberglass models. Clarion's acrylic models are vacuum formed from a one-piece solid sheet of cast acrylic to provide years of care free use. Each whirlpool is engineered and manufactured to meet the most demanding specifications. Clarion's acrylic is the tub of choice for many families. Clarion's gel-coated fiberglass whirlpools and soaker tubs are manufactured with the same exacting standards as our acrylic products.
