## Collapsible Threshold & End Caps

### **Clarion Bathware introduces the new and improved collapsible threshold with end caps.**

- \*This improvement utilizes our original threshold design with the addition of end or termination caps that improve the aesthetics and simplify the installation process.
- \*This innovation is a recommended accessory for all of our ¾" threshold shower stalls, but is also available for purchase as a standalone product for any low threshold units.

**Instructions**

Cut on dashed line.

Use template to determine which radius best fits your shower stall.

Measure width of threshold flange to determine the length of collapsable threshold needed.
